

Did you **Know** that...

We spend an average of 50 minutes in the bathroom every day?

The bathroom is where people hate to feel cold the most?

The bathroom is the most important feature in the resale value of a house?

Why heat the whole house when it's just the bathroom that feels cold?

Heating requirements are different in the bathroom than in the rest of the house. Convectair has developed an entire heating line with you in mind: all Convectair units meet your comfort needs and enhance your bathroom decor.

Whether you choose a simple timer-equipped fan heater for quick heating or a more sophisticated model with radiant heat, hot-air circulation and towel-warming features, with Convectair, you'll bask in extraordinary comfort. Say goodbye to bathroom shivers for good!

Now comes the hard part: choosing!

③ Control panel designed to accept the 7392 Programmer module.
① Color: BB = white; BM = mimetic white (off-white); GR = grey [USA: Calypso available in white only].
② Compatible with the Programmer system.
③ Not compatible with the Programmer system.
④ Not compatible with the Programmer system. For use with 120 V outlets, CSA- and UL-listed.
⑤ USA: Add letter "A" before catalogue number, for example, A7825-C20 (UL-listed).

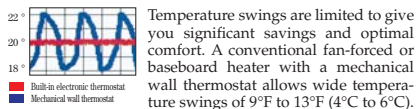

⑥ Towel bars sold separately.
⑦ Depth calculated from the corner.
⑧ Wattage can be selected at the time of installation. Convectair recommends the installation of a wall timer (sold separately). Consult your electrical contractor.
⑨ Visible thickness: 1 1/4" (4.1 cm). Total thickness: 4 1/4" (11.8 cm).

7392 Programmer System Module: Comfort à la carte

Designed to fit in the control panel of any Alto, Mezzo, Solo, Allegro, Tenor, Opera and Allegro Duo heater, the 7392 module is an easy way to manage your home heating while ensuring better energy efficiency and ideal comfort.

Depending on the programs you select, the Programmer system automatically sends signals to each Convectair unit under its control, lowering or raising the individual room temperature to the comfort level you desire. The module can manage up to 20 Convectair heating units at a time (except the Soprano and Apéro models). You benefit from personalized heating that is perfectly suited to your daily schedule and needs, day and night. Requires a 7382, 7383, 7384, 7300, 7715, 7720 or 7792 Convectair heater and appropriate wiring.

Convectair ultra-precise, built-in electronic thermostat...accurate up to 1/5°F (1/10°C)

Temperature swings are limited to give you significant savings and optimal comfort. A conventional fan-forced or baseboard heater with a mechanical wall thermostat allows wide temperature swings of 9°F to 13°F (4°C to 6°C). The built-in electronic thermostat is one of Convectair's major advantages, regulating the temperature to within one-fifth of a degree. There's no need to readjust the temperature to accommodate the ups and downs of the outside temperature. Set your comfort level once and for all, and leave the rest to Convectair. Your heaters will maintain the gentle, even temperature you want.

WARRANTY

- 2 years against all defects
- 5 years on heating elements

All Convectair products are covered by a double warranty: a two-year warranty against all material and manufacturing defects, and a five-year warranty on the heating elements. Full warranty information is provided with each appliance.

In keeping with our ongoing commitment to research and development, we reserve the right to change product specifications without notice.

All Convectair heating units are equipped with short-circuit protection for optimal safety, even in areas that are damp or subject to splashes.

Convectair offers a vast range of electrical heating units to meet every need and suit any decor. It's heating at its very best!

DIVA

Heat wave !

This sleek model will heat your bathroom and warm your towels. Equipped with a timer for quick heating and a function selector, the entire surface of the Diva produces radiant heat, which can be combined with hot air circulation from the bottom grille. The Diva is equipped with 2 pegs, 2 towel bars and an easy-to-clean lint filter.

Radiant heat surface: 500 W
 Radiant heat and hot air : 1500 W (240 V)
 Programmable
 White only

BOLÉRO

Everything you're looking for

The Boléro, an elegant classic, allows you to choose the type of heating you prefer: radiant heat (750 W), radiant heat and hot-air circulation (2000 W) or room-temperature air circulation.

Heat can be controlled through an electronic thermostat or built-in timer. The Boléro is equipped with 2 pegs and 3 reversible and adjustable towel bars, as well as an easy-to-clean filter.

Combined heating : 2000 W (240 V)
 Programmable
 White only

OPERA

A sunny corner for your bathroom

The Opera is ideal for rooms where fitting in a heating unit is a challenge.

This streamlined model easily tucks into a corner and radiates heat silently and efficiently. The Opera – an innovative solution to your space problems – features a built-in electronic thermostat and is compatible with the Programmer system.

Two optional towel bars transform the Opera into a towel warmer without affecting heat quality.

750 or 1250 W (240 V)
 Programmable
 White or beige

SOPRANO

Small but mighty !

This unit aims hot air downward and heats your bathroom in a flash. An optional timer control or a thermostat (sold separately) provides extra-quick heating just when you want it, for as long as you want. It's a definite space saver and is ideal for cramped spaces. It can be installed high up on a wall or above a door, and is sure to warm you up from head to toe!

750 or 1500 W (120 V, 240 V)
 Control not included
 Not programmable
 White only

CALYPSO

The warmth of a tropical breeze... instantly !

The unique and ingenious Calypso is an innovative electric heater designed specially for your bathroom. Combining a quiet fan and timer, this unit allows you to select electronic thermostat-controlled heating (1000 W) or the quick-heat option (2000 W) for up to 30 minutes. The Calypso is also equipped with an easy-to-clean lint filter and is compatible with the Programmer system. Mounted 10" (25 cm) off the floor, the Calypso is always easy to get to... without ever getting in the way.

1000 / 2000 W (240 V)
 750 / 1500 W (120 V)
 Programmable (240 V only)
 White or off-white (Canada only)

SAMBA

Streamlined, silent and efficient

The Samba, which is ideal for bathrooms, is a built-in unit with a visible thickness of just 1 5/8" (4,1 cm). Compatible with the Programmer system, its natural convection heating, controlled by a built-in electronic thermostat, is absolutely silent. With the timer-controlled quick-heat option, you can attain the ideal comfort level even faster.

1000 / 2000 W (240 V)
 Programmable
 White only

JAZZ

Modern and efficient

Thanks to its flexible, easy-to-use heating controls, the Jazz keeps your bathroom temperature in tune with your needs. Natural convection heat is controlled by an electronic thermostat to give you quiet, comfortable, even heat throughout your bathroom. The built-in timer and function selector allow you to choose just the right combination of time and heat for soft, warm towels. The heat is blown through the holes in the towel bars. And in the summer, you can select room-temperature ventilation to dry wet towels.

1000 / 2000 W (240 V)
 750 / 1500 W (120 V)
 Programmable (240 V only)
 White only
